Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

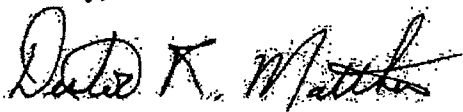

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" being more prominent.

Raleigh, North Carolina

SANITARY ENGINEERING
DIVISION

Dear Mr. Usry:

It is my understanding that the recently adopted Solid Waste and Disposal rules and regulations require each municipality to develop plans to correct substandard solid waste disposal facilities.

It would be appreciated if your office would assist us in determining if our sanitary landfill operated by the City is in compliance with the regulations of the State Board of Health. I believe it would be necessary to determine whether our landfill is substandard or not before making any plans for changes. Please let me know if you can assist us in this matter.

Sincerely yours,

Gary M. Garlow

Mr. Randolph Hendricks
Planning Coordinator
State Planning Division
Department of Administration
Raleigh, North Carolina

Re: GS 72-0109
Solid Waste Management System
Edgecombe County

Dear Mr. Hendricks:

This application expresses an intent to apply for Federal assistance to finance a county-wide solid waste management program which would include the Town of Tarboro and possibly the City of Rocky Mount. The project includes the purchase of sites for sanitary landfills, the construction of two landfills, and the purchase of necessary operating equipment and storage containers. The total estimated cost of the project is \$253,000, which amount does not include the cost of construction of roads to the sanitary landfills or the cost of fencing and planting of grass at the sites.

The Engineering Staff of this office assisted Edgecombe County in the development of a county-wide plan for solid waste management. The proposed project conforms to this plan.

We recommend approval of this application.

Very truly yours,

Marshall Gates, Director
Sanitary Engineering Division

cc: Mr. Gene Bennett
Mr. J. D. Chumblee
Mr. Fred J. Wood

JDF:jfh

Our capital investment estimate was for \$210,500 and this project request is for \$250,000.

The increase is due to land purchase increase as all other items remain as recommended.

I recommend approval of the request since land costs vary in every area and our figures can only be suggestive estimate, at best

of Tarboro and Pocky Mount				

3. DESCRIPTION AND PURPOSE OF PROPOSED PROJECT	
<p>A. DESCRIPTION Purchase and development of two sanitary landfills and purchase of equipment for operation of the two landfills. It is anticipated that two sites of 100 acres each will be purchased. Proposed equipment consists of two high-lift loaders, one pickup truck, one mother truck for collection of solid waste, and one hundred containers of four cubic yards each.</p> <p style="text-align: center;">*Proposed by the N.C. State Board of Health and reviewed and recommended by the Edgecombe Planning Board</p> <p>B. PUBLIC INTEREST AND NECESSITY Public interest is evidenced by citizens having requested that Edgecombe County provided facilities for disposal of solid waste for county residents. Necessity is evidenced by the fact that most county citizens have no effective and sanitary method of waste disposal. Pocky Mount residents have access to a sanitary landfill but the remainder of the county's residents must use either open dumps operated by towns or roadside dumps. These dumps are eye sores and a tremendous hazard to public health. The State Board of Health recommends that Edgecombe County regulate collection and disposal of solid waste.</p> <p>C. The town of Tarboro is presently operating a trash dump site that will be completely exhausted after January 1, 1972. Present plans are for the town of Tarboro to use the Edgecombe County landfill facilities when they become operational. Rocky Mount will also have the same opportunity to use county landfill facilities as does Tarboro. Edgecombe County is working toward having its landfill facilities in operation by January 1, 1972.

Attention: Mr. J. G. Whitcup

Dear Sir:

It is requested that this letter be made a part of the Edgecombe
County Solid Waste Disposal Management Plan. JHL

A revision under Section V Cost Analysis, Subsection Sites should
read:

Two (2) sites of 235 acres	\$70,000
(One (1) site of 105 acres)	
(One (1) site of 100 acres)	

This revision was made due to the availability of the additional
land which will give this disposal program an extended life. It
is also realized that all of any given site cannot be used for
landfill purpose.

Sincerely yours,

O. W. Strickland, Supervisor
Solid Waste Management

Mr. Oscar Bissett
198 A South Church Street Extension
Rocky Mount, North Carolina 27801

Dear Mr. Bissett:

Your telephone call to the Governor's Office has been referred to this agency for reply.

I have searched the statutes and regulations in order to determine if there is any action that might be taken to alleviate the problem that you describe. I regret to inform you that there are no statutes or regulations that are applicable to this problem.

There has been established a Legislative Study Commission that has the responsibility for the development of a program that will alleviate the problem of animal waste that exists in many areas of the State. I understand that this Committee is active and will probably report back to the 1975 General Assembly its findings and recommendations. I suggest that you contact Mr. Earle Hubbard, Director, Office of Water and Air Resources, Raleigh, North Carolina, and request his opinion in this matter since he is serving on this Committee.

If I can provide additional information, I shall appreciate hearing from you.

Very truly yours,

Sidney H. Usry, Head
Solid Waste & Vector Control Branch
Sanitary Engineering Section

Post Office Box 18345
Raleigh, N. C. 27609

Dear Mr. Lanning:

This office has no objection to the placing of the waste from Torpedo Wire & Strip Company, Rocky Mount, N. C., in a sanitary landfill providing the amounts and contents are as you stated in your letter of July 19, 1974. The water contents must be lower so that the material will be dry in nature.

The final decision as to any single sanitary landfill receiving the waste is with the owner of the landfill as this office only controls what cannot be placed in a fill, not what they must receive.

Sincerely,

O. W. Strickland, Supervisor

Re: Plating Waste - Torpedo Wire & Strip Company
Rocky Mount, North Carolina

Dear Mr. Strickland:

In response to your letter of July 17, 1974, the concentration of each metal in the wastewater is noted as follows:

<u>Metal</u>	<u>Concentration</u>	<u>Weight of Metal generated/24 hours</u>
Cu	9.65 mg./l	0.70#
Fe	14.25 mg./l	1.03#
Ni	36.25 mg./l	2.61#
Zn	1.16 mg./l	0.08#
Pb	50.00 mg./l	3.60#
Sn	37.75 mg./l	2.72#
Total Weight		10.74#

The above weights are based on an average daily flow of 8,640 gallons. I trust that this information is now adequate.

Very truly yours,

TATE LANNING & ASSOCIATES

Re: Plating Waste - Torpedo Wire and Strip Company, Inc.
Rocky Mount, North Carolina

Dear Mr. Strickland:

Pursuant to our telephone conversation of this date, this letter is to set forth information regarding the sludge to be generated from the pre-treatment process for the above referenced project.

I am advised by officials at the home office of Torpedo Wire in Pittsfield, Pa., that the following makeup of the raw plating waste is considered typical:

Cu	9.65 mg/l
Fe	14.25 mg/l
Ni	36.25 mg/l
Zn	1.16 mg/l
Pb	50.00 mg/l
Sn	37.75 mg/l

Based on an ultimate flow of only 6 gallons per minute, the total waste water flow would be 8,640 gallons per day, which would generate approximately 11 lbs. of metals per day based on the above waste water makeup in mg/l. The Ph of the final treated affluent is expected to be between 8.5 and 9.0. I have no information available to me at this time on the degree of acidity or alkalinity of the sludge.

I would appreciate your reviewing this information and advising me as to whether or not such a sludge could be deposited on the Nash County landfill.

Very truly yours,

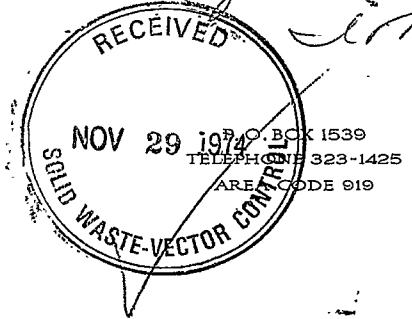

TATE LANNING & ASSOCIATES

Re: Rocky Mount Landfill

Dear Mr. Strickland:

This is to advise you that the person preparing the operational plans for Belmor Corporation's operation of the Rocky Mount landfill has promised that these plans will be in our office on Monday, December 2, 1974.

The purpose of this letter is to advise you that we will be approximately one or two days late in complying with our agreement of October 29, 1974, wherein we had agreed to have these plans to you for approval no later than December 1, 1974. We will either carry these plans to you on Tuesday, December 3, 1974 or mail them to you on Monday, December 2, 1974.

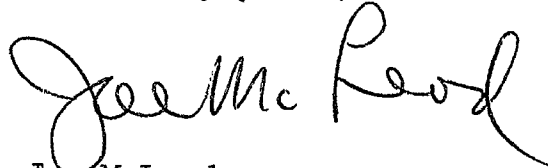

Insofar as our agreement regarding the closed area of the Rocky Mount landfill, this is to advise you that a joint effort is well under way on behalf of the Belmor Corporation and the City of Rocky Mount to close out this area in accordance with your instructions and in compliance with Section 13, C of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal."

If you desire any further information, or if the proposed plan as outlined above is not agreeable with you,

Mr. O. W. Strickland

Dear Mr. Beaudry:

The operational plans for the City of Rocky Mount Solid Waste Transfer Station have been reviewed. The approved request was made by Mr. Jim W. Perry, Vice-President, Waste Industries, Incorporated who will operate the Station under contract with the City of Rocky Mount.

The plans are approved as presented in accordance with .0106 Solid Waste Management Facilities, "Solid Waste Management Rules", Department of Human Resources, Division of Health Services.

The Facility will be placed on our routine inspection schedule and it will be expected to be operated in accordance with the approved plans.

Sincerely,

Jerry C. Perkins, Head

Dear Sirs:

On behalf of the City of Rocky Mount, I have reviewed the operations plan submitted by Waste Industries for the Rocky Mount Solid Waste Transfer Station.

It is understood that there is a contract between Waste Industries and the City of Rocky Mount. Where there may be conflict between this operational plan and the contract, the contract shall take precedence.

This plan is in accordance with all applicable City of Rocky Mount regulations. Approval of this plan is recommended. Please return three (3) approved copies of this plan for our records.

Sincerely yours,

May 24, 1977

Mr. Earl Beaudry
City of Rocky Mount
P. O. Box 1180
Rocky Mount, North Carolina 27801

Dear Mr. Beaudry:

This letter requests approval of an operational plan relevant to the Solid Waste Transfer Station located at Rocky Mount, North Carolina. The plan is submitted in accordance with Section VIII, Rules and Regulations Providing Standards for Solid Waste Disposal prepared by Sanitary Engineering Division, Division of Health Services, Department of Human Resources. The plan is attached and contains one enclosure. Waste Industries, Incorporated (WI) was awarded the contract to staff, operate and manage the Station for the City. We expect operations to start on or about July 5, 1977 to process 185-250 tons of waste per day.

WI will process solid waste as directed by the City of Rocky Mount. Specific guidance will be furnished by Director of Public Works who also shall make the final decision regarding disputed material. Please see paragraph 5 of the general operational plan for details.

It is requested that City of Rocky Mount approve the plan and forward two copies to North Carolina Department of Human Resources for approval. As WI gains experience in operating the Station, changes to the plan may be required. Such changes will be submitted for approval and added as enclosures or amendments to the basic document.

Sincerely,

Jim W. Perry
Vice-President

JWP/ks

Enclosures: General Operations Plan
Daily Operations Plan

GENERAL OPERATIONS PLAN

For: Solid Waste Transfer Station
City of Rocky Mount, North Carolina

Effective: July 5, 1977

1. Location: Near the intersection of SR1542 and Thorpe Road and adjacent to the City of Rocky Mount Municipal Airport.
2. Operating Hours: As determined by the City. Hours will be in consonance with the requirements of the City and landfill receiving hours. Holidays will be those observed by Environmental Services Division, City's Public Works Department.
3. Equipment: Two 11 1/2 cubic yard stationary compactors, one direct-fed hopper, one 40' x 10' x 10' pusher packer, three tandem axle diesel tractors, four 65 cubic yard transfer trailers and one portable auxiliary power source.
4. Personnel: City of Rocky Mount will permanently station one person to ensure that only authorized people dump at the Station. WI will provide a manager, a secretary, one equipment operator, two tractor-trailer drivers and one spare tractor-trailer driver. A mechanic for hydraulic and electrical maintenance will be available as required on an on-call basis. That man will also be capable of providing mechanical assistance for Station tractor-trailer equipment.
5. Waste Accepted: Ashes, garbage, refuse and rubbish, as those terms are defined by the Code of the City of Rocky Mount. WI May refuse to accept any building rubbish, land clearing waste, unduly bulky objects, such as automobiles or truck bodies, or hazardous waste that will be detrimental to Station equipment.
6. Daily Operations Plan: Please see Enclosure 1.
7. Safety: WI will coordinate with local rescue personnel to train its employees in first aid techniques. An appropriate first aid kit will be placed at the Station. Fire plans will be developed and rehearsed. Two fire stations are located at each level of the Station. Appropriate safety classes will be conducted and rigid compliance with correct safety practices will be enforced. Safety signs will be strategically placed.
8. General: The plan will provide solid waste disposal for a population of approximately 40,000. Service will be rendered to the entire municipal area identified as the City of Rocky Mount. As previously mentioned WI will operate and maintain the site; their manager is Leonard J. Greeley. The anticipated lifetime of the contract is through July 31, 1980 subject to extension.

One Enclosure - Daily Operations Plan

DAILY OPERATIONS PLAN
(Enclosure 1 to General Plan)

For: Solid Waste Transfer Station
City of Rocky Mount, North Carolina

WI will accept the solid waste generated within the City of Rocky Mount, compact it into 65 cubic yard trailers and transport it to the designated sanitary landfill. The volume is estimated to range between 185 to 250 tons per day.

1. All employees will report thirty (30) minutes prior to gate opening at 7:30 A.M. Monday through Friday. The Transfer Station Manager will outline the daily work schedule and objectives.
2. Drivers will check their trucks and warm up the engines. They will depart in time to arrive at the sanitary landfill which opens at 8:30 A.M. The waste received too late on the previous day to reach the sanitary landfill prior to closing and the waste received from the City's Dumpmasters in the early morning, is estimated to fill at least two (2) trailers. It is important to minimize very early and very late dumping at the station due to restrictions posed by sanitary landfill hours. No waste will be accepted after 4:00 P.M, except in an emergency situation.
3. Drivers will utilize the Nash County Sanitary Landfill at peak input hours and at the close of each day. This will minimize the amount of on-site storage overnight and maintain a balanced hauling schedule. Longer hauls to the Edgecombe County Sanitary Landfill will be made at low input periods.
4. No waste will be stored overnight in the push pit or hoppers. Partially filled trailers will be pulled away from the building overnight and locked. Full trailers will be parked at the staging area.
5. Each load destination will be designated by the Transfer Station Manager or the Equipment Operator prior to departure and the driver's estimated time of return logged. Loads will be properly distributed to Nash and Edgecombe county landfills.
6. A phone will be manned between the operating hours of 7:30 A.M. to 4:30 P.M., Monday through Friday to provide information to City personnel and citizens using the transfer station.
7. Floor personnel will direct and supervise dumping procedures to insure maximum safety and efficiency.
8. Long hauls (Edgecombe County Landfill) and routine daily maintenance will be made at slack times.
9. All station personnel will clean and wash the facility at the end of each day. Disinfectant deodorant will be applied to kill germs and reduce odor.

DAILY OPERATIONS PLAN

Page 2

10. A reconciliation will be made each day of the hauls made. Landfill receipts will be turned into the Secretary or Manager.
11. The site will be secured and personnel will leave when the above are completed.
12. Saturday morning and late afternoons will be used to perform major maintenance.

Summary

The intent of the Daily Plan is to establish a general pattern of operations. WI, through its Manager, must have flexibility to adjust these procedures as dictated by the circumstances that may arise. Variable factors such as weather, traffic, waste volume, sanitary landfill conditions, and regulations governing waste disposal must be monitored and work procedures adjusted accordingly. Specific rules and procedures will be established prior to and during the conduct of this contract to insure disciplined, orderly, safe and efficient operation and use of the Transfer Station by the Company's personnel and those utilizing the facility.

February 19, 1975

Mr. Hugh G. Young, M.P.H.
Health Director
✓ Edgecombe County Health Department
2909 Main Street
Tarboro, North Carolina 27886

Dear Mr. Young: *JRK*

The funds for mosquito control will necessarily have to be sent to the Edgecombe County Health Department since this is a requirement of the regulations. The distribution of these funds to local governmental units is permissible but this agency requires that the local health department provide the necessary documentation of expenditures for matching credit.

I would suggest that if you decide to distribute the allocation made by this agency to local governmental units that you prepare a form similar to the application that you submit to this office for State financial assistance. The application specifies the requirements that will be necessary for each governmental unit to provide us with certain information that is required. The use of this form would then make the local governmental unit responsible to you in order that you might obtain the necessary information to formally document expenditures to this agency.

With regard to the status of the rodent control program, I have requested that Mr. D. F. Ashton, Entomologist, be responsible for obtaining necessary information in regard to the establishment of such programs on a local level that will meet the Environmental Protection Agency requirements. Mr. Ashton is out of state at the present time but I will have him contact you as soon as he returns and discuss with you the requirements that will be necessary to operate such a program. He is already familiar with the Environmental Protection Agency requirements and the requirements of the North Carolina Pesticide Board.

If I can provide you additional information or assistance in regard to either of these subjects, I shall appreciate hearing from you.

Very truly yours,

Sidney H. Usry, Head
Solid Waste & Vector Control Branch

North Carolina Division of Health Services
P. O. Box 2091
Raleigh, North Carolina 27602

Dear Sid:

Sometime ago we discussed the State's provision of rat poison to be mixed and distributed by local health departments. As I recall, you told me that EPA has ruled that local health departments cannot mix rat poison unless they are certified.

Also I recall that you were to meet with officials of EPA in order to reach some understanding in this matter. As you know, this is a most important service that traditionally has been provided by local health departments. The health Department has been overwhelmed by telephone calls in regard to the cessation of this program.

Can you please provide me with the requirements for certification of one of our staff members in order to continue this program? Also, please provide me with requirements for the facilities used for the mixing of rat poison.

If no progress has been made in your negotiations with EPA, I would like to contact them on behalf of the North Carolina Association of Local Health Directors in order to see if some reasonable solution can be reached.

Yours very truly,

Hugh G. Young, M.P.H.

Mr. Sid Usry, Head
Solid Waste and Vector Control Branch
North Carolina Division of Health Services
P. O. Box 2091
Raleigh, North Carolina 27602

Dear Sid:

We have reviewed our insecticide program and are of the opinion that the program could best be handled by the municipalities in Edgecombe County. In order to bring this change about we proposed that the appropriation from the State be distributed to participating towns.

Can you provide us with information that we may send each municipality in Edgecombe County stating the requirements placed on them if they receive funds from the insecticide program. We need this information immediately as the towns are now preparing their budgets for the coming year.

We feel that many of the towns can effectively use this money for mosquito control.

A related concern of ours is that we have not received our final payment for last years program. As you know, we have expended this money and need to settle our accounts.

Yours very truly,

RE: CH 75-0875, Tarboro's Housing & Community Development Program

In those areas scheduled for demolition, it is recommended that an extensive rodent control program be implemented prior to the destruction of the abandoned houses in order to prevent the migration of the rodents to adjacent areas. The demolition wastes that are accumulated from this should not be delivered to a local landfill but should be disposed of at a separate site since this volume of inert material would greatly reduce the life of a sanitary landfill,

Mr. Earl Johnson, Environmental Services, City of Rocky Mount, Rocky Mount, N.C.
Mrs. Jackie Wall, Pollution Help Line, Raleigh, N. C.

REPORT:

This investigation was made in response to a Pollution Help Line Report made by Mr. Donald Melvin of Rocky Mount.

Mr. Earl Johnson who works with the City of Rocky Mount Environmental Services Division was asked to accompany me on the investigation because the property is located within the City limits.

Mr. Melvin's complaint is in reference to property owned by N. C. Hide and Fur Company near his home on Boone Street. We found the property to be a storage yard for salvaged auto parts that have been crushed. The company is a scrap metal dealer.

Because the salvage yard appeared to be a legitimate business and is not in violation of the Solid Waste Regulations, we referred the complaint to the City of Rocky Mount Zoning officer. He stated that locating a salvage yard within a section zoned residential is in violation of zoning laws. He agreed to contact the property owner.

I was unable to contact Mr. Melvin at the telephone number given on the Pollution Help Line Form. Mr. Johnson agreed to contact Mr. Melvin and give him an explanation of the action we were taking.

Mr. Frank Fielding, Administrator
Rocky Mount Sanatorium
Coastline Street
Rocky Mount, North Carolina 27801

Dear Mr. Fielding:

I am writing in reference to your method of handling pathological and infectious waste.

Sanitarians from the Nash County Health Department informed me that you dispose of these types of waste in a dumpster along with all other solid waste generated by your facility. Final disposition of all waste deposited in the container is at a landfill site.

Infectious and pathological waste are potentially hazardous and are included in the definition of hazardous waste in the North Carolina Division of Health Services "Rules and Regulations Providing Standards For Solid Waste Disposal".

Because there is a potential public health hazard, we are requesting that you make arrangements to incinerate all pathological and infectious waste that you generate before it is disposed of in a landfill.

If I can be of any assistance to you concerning this matter, please contact me.

Sincerely,

Blum

Mr. Allen Lee Harrell
County Manager
Edgecombe County
Tarboro, NC 27886

ALH
Dear Mr. Harrell:

I was talking by telephone with Mr. Martin Sasser and he asked me to give you some information concerning fees that are charged at landfills throughout the state. It is almost impossible to compare rates due to the variation in volumes at the different sites, so please keep this in mind when you study these figures.

- New Hanover County - \$.85 per cubic yard with the contractor providing the site.
- Rockingham County - owns and operates a site and charges \$.35 per cubic yard.
- Randolph County - is on the third year of a four year contract. They own the site and pay a contractor \$76,080 to operate the site for the total population of the county (75,000 plus or minus). The contractor is payed out of tax money.
- Wake County - provides two sites. They pay a contractor to operate the sites at a set fee. The county collects \$.55 per cubic yard at the gate.

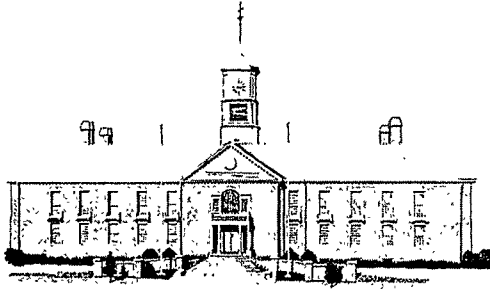

I would estimate that it is costing an average of \$2.00 - \$3.00 per ton to landfill waste throughout the state, including land cost. Using a figure of 500 pounds per cubic yard of compacted waste, this runs from \$.50 - \$.75 per cubic yard and again the volume of waste received makes the cost per unit vary so much.

Sincerely,

O. W. Strickland, Supervisor
Solid Waste Management Unit
Solid Waste & Vector Control Branch
Sanitary Engineering Section

Dear Bill:

Edgecombe County has set up a new department of Solid Waste as of July 1, 1976. I have been transferred from the Health Department and I'm now the Director of Solid Waste for Edgecombe County. My new address is P. O. Box 10 and my telephone is 823-1010.

MS
The first time you are passing this way please stop by and visit. There are many things I'd like to talk to you about.

This office plans to cooperate with all involved agencies and we plan to have one of the best operations in North Carolina.

Sincerely,

Martin G. Sasser, R.S.
Director Solid Waste

INFORMATION FOR BIDDERS - ADDENDUM I

THE CITY OF ROCKY MOUNT, NORTH CAROLINA
SOLID WASTE TRANSFER STATION

The City of Rocky Mount will provide the following work through its own facilities and personnel:

- 1.) Clearing and grubbing in accordance with Paragraph 5 of the Special Conditions.
- 2.) All required fill material, and the rough grading of the approach roadway and rampway up to the main floor elevation.
Ref: Special Conditions, Para. 6.
- 3.) Sanitary sewer to the site. Ref: Special Conditions, Para. 3.
- 4.) City water to the site. Ref: Special Conditions, Para. 3.
- 5.) All roadway and apron base preparation and materials, all bituminous concrete surface preparation and materials, but not including any concrete work.

Dear Sir:

This office was notified by Mr. Martin Sasser of the Edgecombe County Solid Waste Department that you are dumping solid waste at the J. T. Abrams farm near Crisp.

We are informing you that this open dump is an unauthorized disposal site that is in violation of the State Regulations. The site will be closed in the very near future.

You are requested to discontinue use of this site. All of your waste can be disposed of at the Edgecombe County Sanitary Landfill.

Your cooperation concerning this matter will be appreciated.

Dear Bill,

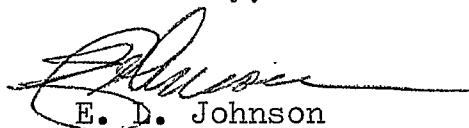

This is to confirm our recent telephone conversation wherein the City of Rocky Mount requested permission and received your approval to operate the City landfill for an additional six months.

We anticipate construction of our transfer station to begin within a few days. Weather permitting, we expect the station to be operational about 1 May 1977. This will coincide with closing of the landfill.

Your cooperation is appreciated and we welcome your visits to observe construction progress of the transfer station.

Post Office Box 1459
Tarboro, North Carolina 27886

Dear Martin:

It sure was nice to talk with you by telephone today. You may not be in the Health Department but you will always be a part of Public Health as far as I am concerned.

In reference to our conversation, I would estimate that there are about one-third of the counties in the State that make a charge at the landfill gate. There are so many ways that counties pay for their programs that it would be impossible to explain each. I would recommend that you take a good look at the method that Wilson County uses.

I look forward to visiting you in the near future as I take a look at the Rocky Mount transfer station.

Hope to see you in Wilmington.

Sincerely,

O. W. Strickland, Supervisor
Solid Waste Management Unit

June 19, 1978

Mr. Mike Joynor
Metals, Incorporated
Post Office Box 1245
Rocky Mount, North Carolina 27801

Dear Mr. Joynor:

I have reviewed the chemical characteristics of the acid fluoride waste for which you wish to find a proper disposal method. Acid fluorides, in general, are quite toxic and must be handled and disposed of very carefully to avoid danger to people and the environment.

Using mason's lime (calcium hydroxide, or hydrated lime) which is available at a builder's supply, add slowly and carefully to the acid fluoride liquid you have. Use care, as you may have a rapid reaction if this waste material is highly acid! Do not breathe any fumes which may result! Use a hood or fan to remove acid fumes. Add enough lime to raise the pH of the resulting mixture to between 8.0 and 9.0 pH. After the pH has stabilized and you are sure it will stay between 8.0 and 9.0, use this material in place of water to mix up a mortar or cement-type mixture. Use Portland Cement (builder's supply) and sand and mix in a mortar box or similar container. Add enough dry material (sand and cement) so that the resultant mix is thick enough to set up like ordinary cement. Place in open top drums and allow to set up.

We specifically recommend the use of lime to raise the pH rather than caustic soda or caustic potash because the calcium fluoride formed will be relatively insoluble and will thus reduce the hazard of landfilling this material.

Please contact Mr. Billy W. Morris (919/752-0146) or me (919/733-2178) when this material has been processed and ready to landfill. One of us will come and look at it and give you final approval prior to sending it to the landfill.

This is an interim procedure and disposal method. When approved chemical landfills are set up within the state the above procedure may be modified or changed.

Mr. Joyner
Page 2
June 19, 1978

An alternative would be for you to send this to an existing chemical landfill. A list of such facilities is included for your possible use.

Please call if you need further help in this matter.

Very truly yours,

Damon C. Antel
Special Waste Surveyor

Mr. Martin Sasser
✓ Director of Solid Waste
Edgecombe County
Post Office Box 10
Tarboro, NC 27886 *AWT VC*

Dear Martin,

There are very few landfills in North Carolina that receive tires unless they have been shredded, sliced or cut into at least four pieces.

A few landfill operators have provided the slicing or shredding machines on-site. From my observation this has not proven to be very successful. It is much more successful when private enterprise provides the service before the tires are received at the fill.

A standard automobile tire utilizes about two cubic feet of space in your fill if it is not shredded, sliced or cut, so I would recommend that no tires be received without proper preparation.

I understand from Billy Morris that you are operating an excellent landfill. I certainly want to get by to see you.

Sincerely,

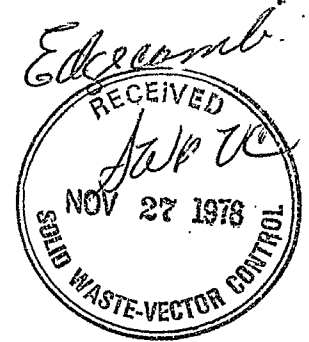

O. W. Strickland, Supervisor

Dear Earl,

I need some information from you. The voucher numbers for expenditures made during the months of August, September and October were not included with the monthly reports. This information is required before funds can be disbursed. Please get these for me as soon as you can so I can proceed with your allocation.

If you have any questions you know where to reach me.

Sincerely,

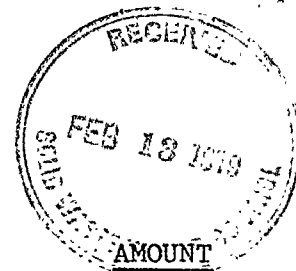

Tom Blailock

Gentlemen:

Re: 1978-79 Mosquito Control Allocation

THE DIVISION OF HEALTH SERVICES "STATE AID FOR MOSQUITO CONTROL RULES", REQUIRES THAT THE RECIPIENTS OF STATE FUNDS SUBMIT MONTHLY REPORTS SHOWING THE WORK PERFORMED, EXPENDITURES MADE, FACILITIES UTILIZED, AND MATERIALS EXPENDED BEFORE ANY STATE FUNDS ARE DISBURSED.

Based on local anticipated expenditures shown on your application for State Aid in Mosquito Control during fiscal year 1978-79, the following allocation has been made for your adulticiding program:

Total State Allocation \$ 5,000.00

Sincerely,

Thomas T. Blailock

APPLICATION FOR STATE AID IN MOSQUITO CONTROL

APPLICANT: CITY OF ROCKY MOUNT DATE: 7/17/78
(Board of Health, City Council, etc.)

ADDRESS: P.O. Drawer 1180, Rocky Mount, N.C. 27801

Application is hereby made to the Division of Health Services for aid in mosquito control for the fiscal year ending June 30, 1979. The applicant has appropriated the funds shown below for mosquito control during the fiscal year and has in its possession, or otherwise available, the other assets and facilities listed.

MOSQUITO CONTROL PROJECTS (Adulticiding, Larviciding & Minor Drainage)

(a) Cash	\$ <u>35,120.00</u>
(b) Equipment Rental (Attach itemized equipment list with rental computed according to attached schedule)	\$ <u>2,350.00</u>

WATER MANAGEMENT PROJECTS

(a) Cash	\$ <u>-0-</u>
(b) (Attach list of equipment to be used during the project year)	

TOTAL LOCAL ASSETS \$ 37,470.00

As the duly authorized official of the applicant, I have drawn and herewith submit this application for mosquito control aid. I agree that the following provisions of this instrument shall be binding upon the use or expenditure of any funds or other assets allocated:

- To assume such responsibility for claims for damage resulting from the operation of the project as is necessary to absolve the State or any of its departments or agencies from any liability whatsoever from such claims.
- To submit such plans as may be required to the Division of Health Services, and to perform all work in conformity with the plans that are approved by the appropriate representative of the Division of Health Services.
- To use funds provided by the Division of Health Services and those shown on the project application as being provided by the applicant exclusively for mosquito control, in accordance with the approved plan and the regulations of the Division of Health Services.
- To perform all mosquito control under the direction of a competent supervisor whose qualifications meet the approval of the Division of Health Services.

(over)

- E. To submit reports and a certified financial statement at the end of each working month showing work performed, expenditures made of both local and State funds, facilities utilized, and materials expended.

MOSQUITO CONTROL PROGRAM

ROCKY MOUNT

1978 -79

The mosquito control program in Rocky Mount is conducted by the Environmental Services Division. The program as usual, will consist of the three basic steps for mosquito control: permanent elimination, larviciding, and adulticiding.

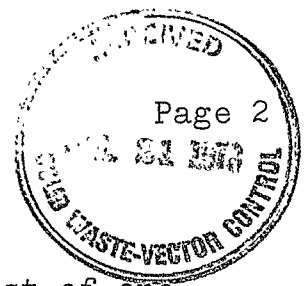

Permanent Elinination, which is one of our most important parts of mosquito control, is carried out by education and draining or filling where feasible. By education we mean to inform the public on mosquito control through proper sanitation by local news media, personal contact, and our annual clean-up campaigns. The draining or filling where feasible is done by the Department of Public Works at the request of the Environmental Services division.

Larviciding, the larviciding program is carried out with the use of five laborers, one inspector and one labor foreman under the direction of the Assistant Superintendant. All ditches and standing bodys of water within and adjacent to the city is checked at least once a week, and where necessary number 2 fuel oil mixed with a spreaderchemical is applied.

Adulticiding Program, the adulticiding program consists of two ULV foggers. Malathion insecticide is use in both machines. Adulticiding is done only when permanent elimination and larviciding have failed.

Mosquito Control

1978 - 79

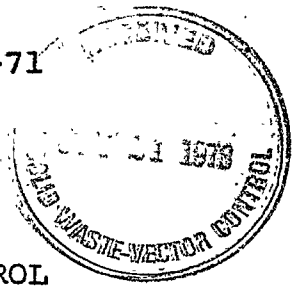

The personnel of the Mosquito Control program consist of one supervisor, one labor foreman, one inspector, and five laborers of which one is full time and 4 are part-time laborers.

RESOLUTION DESIGNATING OFFICIAL
TO SIGN NECESSARY PAPERS AND TO OTHERWISE
REPRESENT THE CITY IN CONNECTION WITH MOSQUITO CONTROL

BE IT RESOLVED by the City Council of the City of Rocky
Mount:

1. It is hereby ordered that Earl Johnson, as agent for the City of Rocky Mount, is hereby authorized and empowered to sign and execute all papers and documents necessary in connection with the request made to the Division of Health Services, North Carolina Department of Human Resources, for aid in the control of mosquitos.

2. It is hereby further ordered that Earl Johnson be and is hereby further authorized and required to carry out all agreements stipulated in the project application submitted by the City to the Division of Health Services, North Carolina Department of Human Resources, and to perform other acts that are proper and necessary in connection with the operation of this project. Acts of said person in behalf of the City of Rocky Mount are in all respects validated, approved and confirmed.

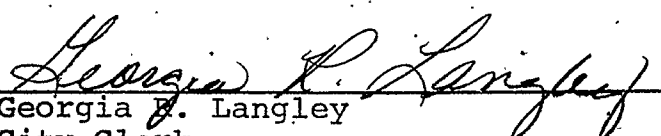

Adopted: July 10, 1978

① Tarboro

Tarboro is now using the County landfill. They still need to do some work on their old city disposal area. They are presently hauling limbs and demolition waste to the city site. We inspected the city site July 26, and found a large amount of paper and some putrescibles mixed in with the limbs. At that time we had a conference with John Chapman - Public Works director about the problem. He said they planned to push the existing waste in the trench on the site and then haul only clean wood waste and limbs to the site. We inspected the site again on August 9, and found that no action had been taken yet. Please write to David Taylor - City Manager - about closing the site and what we will allow to go to the site.

② Speed - (Are not using landfill)

Speed is a very small incorporated town. They are operating an extremely bad open dump that was not recorded on 1968 survey. We conferred with a member of the town board Mr. Howell. He said to write to the Mayor - John Kirkland - about closing the dump and using the landfill!

Edgecombe County (cont.).

✓ ③ Conetoe - (are not using County landfill)
Conetoe is presently operating an open dump. The man to write in Conetoe is Mayor J. B. Bryant. We had a conference with Mr. Bryant. The town is trying to acquire a surplus state truck (long body dump) to haul waste with. Conetoe has about 150-200 people.

✓ ④ Macclesfield - (are not using County landfill)
Macclesfield is continuing to operate an unsightly open dump next to the town cemetery. We conferred with Mrs. Mamie Pittman - town clerk on August 8. The town board has discussed purchasing a packer truck. There has also been some discussion about using a 40 yd. container serviced by Liebers Sanitation. The man to write in reference to closing the dump and using the landfill is Mayor Paul D. Etheridge.

✓ ⑤ Pinetops - (are not using County landfill)
Pinetops is continuing to operate an open dump. We had a conference with Milton Carter - Town Clerk - on August 8. The man to write in reference to closing the dump and using the landfill is Willie Phillips - Mayor.

✓ ⑥ Princesville - (are now using the County landfill)
Princesville has an open dump which has not been closed. The town has not hauled to the dump in about 6 months. Prior to opening the County landfill Princesville use the City of Tarboro site. (over)

Princetonville (cont.)

for disposal. We had a conference with
Harvey White - Town manager on August 9.
He is the person to write regarding the
Princetonville dump.

Miss Sandra A. Rogers
Assistant Home Economics Agent
Post Office Box 128
Tarboro, North Carolina 27886

Dear Miss Rogers:

Reference is made to our conversation on April 20, 1972, regarding the availability of films on sanitary landfills. I suggest that you request the film entitled "Trouble with Trash" from the North Carolina State Board of Health Film Library. It is my opinion that this will serve very well to explain sanitary landfill operations.

The other film that I discussed with you, "Defenders of Public Health" is no longer available and we have not been able to obtain reprints.

If I can provide you with additional information, I shall appreciate hearing from you.

Very truly yours,

Sidney H. Usry, Chief
Solid Waste & Vector Control Section

SANITARY ENGINEERING
DIVISION

Dear Mr. Perkins:

Reference is made to your letter of October 11, 1972 requesting the status of action taken on the requirements of a report dated June 2, 1972 concerning the solid waste disposal site for Rocky Mount.

Plans and reports are being prepared as quickly as possible to advise of the exact status of all requirements of the report. It is anticipated that this report and plan will be submitted on or before November 25, 1972.

We have experienced major delays in obtaining adequate topography on the waste disposal site, but now have this in hand and will proceed as quickly as possible with the plan and report.

Your cooperation in allowing us this time to complete the plan and report is greatly appreciated.

Sincerely yours,

Russell Buxton

Dear Mr. Eason:

As a result of our telephone conversation earlier today, I have checked on the requirements by the State Board of Health for approval of the county's proposed landfill site. All of these requirements have been met and documentations of such are available in our records.

According to our records, a letter dated February 24, 1972, from the State Board of Health to several citizens in the Rollingwood area stated that the site in question has been approved in accordance with the requirements of the N. C. State Board of Health "Rules and Regulations Providing Standards for Solid Waste Disposal." A copy of this letter is enclosed for your review.

I feel that this statement by the N. C. Board of Health will supply the information that you requested. However, should you still have doubt concerning approval of the site, I will be happy to discuss the matter with you.

Sincerely,

J. Wayne Deal

Re: House Bill 337
Approval-Sanitary Landfill Sites

Dear Mr. Usry:

Edgecombe County is aware that House Bill 337 places new requirements upon approval of sanitary landfill sites. We are therefore happy to provide the enclosed description of the site that we are currently using as a sanitary landfill.

While uncertain as to the definite procedures required by the new legislation, Mr. Martin Sasser, Edgecombe County Sanitarian Supervisor, and I both feel that you will need this enclosed description. Should you need other information or assistance, we will be happy to cooperate in any way that will be beneficial.

Dear Mr. Kirkland:

The county has now made a sanitary landfill available in Edgecombe County. It is requested that the Town of Speed take advantage of this new disposal site and close their present dump in accordance with Section XIII, C, 1-4 of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal", a copy of which is enclosed.

Thanking you in advance for your cooperation and if this office can be of assistance, please let us know.

Sincerely,

O. W. Strickland, Supervisor
Solid Waste Management Unit

Tarboro, N. C. 27886

Dear Hugh:

I would like to congratulate you and Martin on the Edgecombe
County Solid Waste Management Program. Mr. Wood and Mr. *WTR*
Morris have nothing but praise for the operation of the site.

I am glad that our staff has been able to provide some assist-
ance.

The information you requested is enclosed. Your County Attor-
ney should be able to advise but I believe you are within the
law with your program.

Again let me express my appreciation to you and to Martin
who has been called upon to accept a great deal of added
responsibility with the implementation of this program.

Very truly yours,

O. W. Strickland, Supervisor

COOPERATING WITH

N. C. STATE BOARD OF HEALTH

TARBORO, NORTH CAROLINA 27886

November 16, 1973

Mr. William Strickland
Sanitary Engineering Division
N. C. State Board of Health
Raleigh, N. C. 27602

Dear Bill:

It has been brought to my attention that Legislation passed by the recent General Assembly may effect the right of counties operating landfills, with any use of county-wide tax funds, to make charges to municipalities for the use of such landfill sites.

Copies of all Legislation passed by the recent General Assembly concerning landfill operations will be most appreciated. As you know, our landfill site is operated by a private contractor but we are most interested in all changes that may have been made by the recent General Assembly.

You may be interested to know that we have negotiated jointly with the City of Rocky Mount and Liebers Sanitation Company in order to provide better service for the entire county. We are hopeful that the City of Rocky Mount will, in the immediate future, open their landfill site to residents of Edgecombe County thereby providing a landfill site in the eastern and western portions of the county.

Up to this time we are pleased with the service provided by Liebers Sanitation Company and feel that things are working well. Martin Sasser has worked very hard to see that the highway leading from Tarboro to the landfill site is not littered and he has received excellent cooperation from the contract and private haulers in the area. Much time has been spent working with these people, including trailer park operators, and with the small communities in the county.

Bill Morris and Fred Wood have both assisted Martin in this endeavor and we are appreciative of their help.

Any new information you may have concerning the success or problems of container systems will be beneficial to us at this stage of our long-range planning. Your past help in the establishment of the waste disposal operations is most appreciated.

Yours very truly,

A handwritten signature in cursive script that reads "Hugh".

Hugh G. Young, M. P. H.
Edgecombe County Health Director

TOWN OF TARBORO
NORTH CAROLINA

OFFICE OF
TOWN MANAGER

June 29, 1972

Mr. Sidney H. Usry, Chief
Solid Waste and Vector Control Section
Sanitary Engineering Division
State Board of Health
P. O. Box 2091
Raleigh, North Carolina 27602

Dear Mr. Usry:

Reference is made to your letter of June 7, 1972 addressed to City Managers, Town Clerks and Health Directors concerning the Requirements of the North Carolina State Board of Health "Rules and Regulations Providing Standards for Solid Waste Disposal" regarding Non-conforming Sites.

The Town of Tarboro presently operates a modified sanitary landfill which would probably be classified as a "non-conforming" site when the provisions of Section XI of your Rules and Regulations Providing Standards for Solid Waste Disposal are applied.

The Town of Tarboro has been taking solid waste from persons located outside of the corporate limits of Tarboro so long as they brought the solid waste to the disposal site. For this reason, the Town has been negotiating with the Edgecombe County Board of Commissioners for several months whereby Edgecombe County would establish a countywide sanitary landfill. In recent months the county has purchased one site and are now looking for additional sites in the county. When these negotiations first began, it was anticipated that Edgecombe County would be in operation with their site by July 1, 1972 and we would be able to permanently close the Town of Tarboro site. However, this has not proved to be the case and all indications are that it will be July 1, 1973 before the county will be in full operation.

RECEIVED

JUN 20 1972

SANITARY ENGINEERING
DIVISION

Mr. Sidney H. Usry

-2-

June 29, 1972

Attached hereto is a copy of a letter dated May 25, 1972 addressed to the Mayor of the Town of Tarboro from the Edgecombe County Manager in which he states that they expect to be in operation by July 1, 1973.

In order to upgrade the existing landfill to comply as near as possible with the requirements of Section XI of your rules and regulations, the Town Council has recently authorized a fence to be installed along the road frontage of the landfill site where all entrances are maintained. Due to the cost factor, Council did not authorize the installation of a fence around the complete landfill site. However, what has been authorized should be sufficient to deny entrance to the site except through a controlled gate entrance. The bids for this fence have been awarded and the fence is presently under construction. Also the Council has authorized the employment of an attendant to be on duty at the site at all times while it is open for public use beginning at such time as the fence is installed.

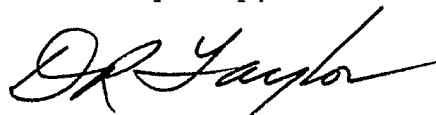

Our best estimates indicate that we have a sufficient amount of land to carry our landfill operations for an additional eighteen months on this particular site.

At this time we anticipate the use of this landfill site from now until July 1, 1973 at which time we anticipate that Edgecombe County will have its site operational and we will be able to begin using it. At the time we begin using the Edgecombe County site, we will then close out the Town site in accordance with your rules and regulations.

With the improved conditions that have been outlined in the foregoing paragraphs and with the reasonable assurance that Edgecombe County will be in operation by July 1, 1973 with a countywide site, we respectfully request your approval to continue operating our site as a modified sanitary landfill site which will not conform to all of the operational requirements for sanitary landfills as set forth in Section XI of your rules and regulations. In any event, it appears to us that we will be able to close out this site completely in a manner satisfactory to the State Board of Health by the July 1, 1974 deadline.

Your prompt consideration of this request and notification to us that we may continue on this basis will be most appreciated.

Yours very truly,

David R. Taylor
Town Manager

TARBORO, N.C.

May 25, 1972

Honorable E. L. Roberson, Mayor
Town of Tarboro
Tarboro, North Carolina 27886

Dear Mayor Roberson:

Immediately after your request at last night's commissioner's meeting, lengthy discussion arose in regard to solid waste disposal in Edgecombe County. The Board fully realizes that solid waste disposal is a county-wide problem. They also realize the seriousness of Tarboro's waste disposal problems.

In order to aid your decision as to what steps Tarboro needs to take, the Board attempted to set a tentative date as to when the county will make a landfill site available to all county residents. It was decided that the county will proceed with reasonable haste in making such a landfill site available. Even if work proceeds with a great deal of success, the Board feels that a county landfill can not possibly be in operation before July 1, 1973.

It is hoped that this information will be helpful to you and your council. Should you feel that further discussion of this matter would be beneficial, I am certain that our Board will be happy to meet with you.

Sincerely,

Allen Lee Harrell
County Manager

RE: Wastewater Sludge Disposal
Town of Tarboro, N. C.

Dear Mr. Strickland:

Our firm is preparing a Facilities Plan for the Tarboro 201 Planning Area. In order to get EPA/STATE approval of the Facilities Plan we are required to obtain written approval of the proposed sludge disposal method from the North Carolina Department of Human Resources.

The proposed method of sludge disposal, as outlined in the 201 Facilities Plan, is briefly described as follows:

Waste solids generated in the wastewater treatment processes will be anaerobically and aerobically digested and later dewatered on sludge drying beds. The dried sludge solids will then be hauled to the sanitary landfill for ultimate disposal.

We request your office to review this proposed method and, if satisfactory, provide a letter of approval to the Town of Tarboro, with a copy to our office.

Thank you for your consideration in this matter. Do not hesitate to contact our office if you or your staff have any questions during your review.

Sincerely,

L. E. WOOTEN AND COMPANY

Mr. David Taylor
City Manager
City of Tarboro
Post Office Box 220
Tarboro, North Carolina 27886

Dear Mr. Taylor:

I would like to take this opportunity to congratulate the City of Tarboro for going with Edgecombe County in the new sanitary landfill operation.

To bring the City of Tarboro into full compliance with the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal", it is requested that the old Tarboro disposal site be closed in accordance with Section XIII, C, 1-4 of the rules and regulations.

The City of Tarboro may use the old site for the disposal of limbs, stumps, and other wood waste provided it is free of other materials such as paper. Access to the site must be strictly controlled. If the City of Tarboro uses the site for these restricted materials, it will be placed on our routine surveillance list.

If this office can be of assistance, please let us know.

Sincerely,

TOWN OF TARBORO
NORTH CAROLINA

February 15, 1979

Mr. Thomas T. Blailock
Medicial Entomologist
State of North Carolina
Department of Human Resources
P. O. Box 2091
Raleigh, North Carolina 27602

Dear Mr. Blailock:

Reference is made to your letter dated February 5, 1979 requesting voucher numbers for labor costs for work accomplished in the months of July, August, and September 1978 in our Mosquito Control Program.

In accordance with our telephone conversation on February 9, 1979, the Department of Human Resources has never requested voucher numbers for labor costs. Personnel used in our Mosquito Control Program are regular full-time permanent employees with the Town.

Please note that there was a typing error on the August monthly report form. The amount of total expenditures should have read \$2,437.26.

If you have any questions concerning this matter or if I may provide any additional information concerning this matter, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "John H. Chapman".

Gentlemen:

Re: 1978-79 Mosquito Control Allocation

THE DIVISION OF HEALTH SERVICES "STATE AID FOR MOSQUITO CONTROL RULES", REQUIRES THAT THE RECIPIENTS OF STATE FUNDS SUBMIT MONTHLY REPORTS SHOWING THE WORK PERFORMED, EXPENDITURES MADE, FACILITIES UTILIZED, AND MATERIALS EXPENDED BEFORE ANY STATE FUNDS ARE DISBURSED.

Based on local anticipated expenditures shown on your application for State Aid in Mosquito Control during fiscal year 1978-79, the following allocation has been made for your adulticiding program:

Total State Allocation \$ 1,934.00

Sincerely,

Thomas T. Blailock

APPLICATION FOR STATE AID IN MOSQUITO CONTROL

APPLICANT: Town of Tarboro DATE: June 30, 1978
(Board of Health, City Council, etc.)

ADDRESS: P.O. Box 220, Tarboro, North Carolina 27886

Application is hereby made to the Division of Health Services for aid in mosquito control for the fiscal year ending June 30, 1979. The applicant has appropriated the funds shown below for mosquito control during the fiscal year and has in its possession, or otherwise available, the other assets and facilities listed.

MOSQUITO CONTROL PROJECTS (Adulticiding, Larviciding & Minor Drainage)

(a) Cash	\$ <u>9,893.18</u>
(b) Equipment Rental (Attach itemized equipment list with rental computed according to attached schedule)	\$ <u>800.00</u>

WATER MANAGEMENT PROJECTS

(a) Cash	\$ <u>-0-</u>
(b) (Attach list of equipment to be used during the project year)	

TOTAL LOCAL ASSETS \$ 10,693.18

As the duly authorized official of the applicant, I have drawn and herewith submit this application for mosquito control aid. I agree that the following provisions of this instrument shall be binding upon the use or expenditure of any funds or other assets allocated:

- To assume such responsibility for claims for damage resulting from the operation of the project as is necessary to absolve the State or any of its departments or agencies from any liability whatsoever from such claims.
- To submit such plans as may be required to the Division of Health Services, and to perform all work in conformity with the plans that are approved by the appropriate representative of the Division of Health Services.
- To use funds provided by the Division of Health Services and those shown on the project application as being provided by the applicant exclusively for mosquito control, in accordance with the approved plan and the regulations of the Division of Health Services.
- To perform all mosquito control under the direction of a competent supervisor whose qualifications meet the approval of the Division of Health Services.

(over)

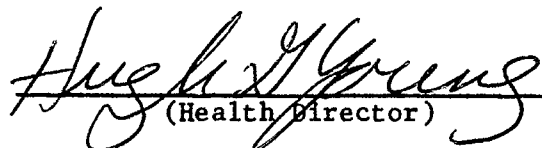

- E. To submit reports and a certified financial statement at the end of each working month showing work performed, expenditures made of both local and State funds, facilities utilized, and materials expended.

IN RE: Disposal Approval of Waste Oil and Waste in SCA Services
Sumter County

Dear Mr. Hubbell:

This office hereby grants approval for disposal of the above referenced waste at South Carolina SCA Services, Inc., site near Pinewood, South Carolina. Approval is for approximately 10,000 gallons, one-time.

Transport of this material must be in such a manner to prevent spillage or leakage and must comply with all State Public Service Commission and Department of Transportation regulations. It is the responsibility of The Anaconda Company and the hauler of the waste to ensure that adequate transportation vehicles are used.

The enclosed Manifest Form is to be used in conjunction with the disposal of this waste. The Anaconda Company must fill out completely the appropriate portion of the form and return the pink copy to this office upon shipment of the waste. The yellow and white copies shall be sent with the waste when transported to the disposal facility with the remainder of the form completed by indicated parties. The disposal facility shall verify the accuracy of the Manifest and return the yellow copy to this office. This Division retains the right to sample any waste going to this site to ensure compliance with the Manifest.

Any changes in composition or volume of this waste, or if any problems are encountered during disposal, this authorization will be nullified. Disposal of this waste at other than the requested facility will require prior written approval from this office.

Sincerely,

Earl Williams
